Point	Flat	Geometry	Right Angle	Shape	Surface	Triangle	
Pyramid	Flat	Geometry	Right Angle	Shape	Surface	Triangle	
Rectangle	Flat	Geometry	Right Angle	Shape	Surface	Triangle	
Triangle	Flat	Geometry	Right Angle	Shape	Surface	Triangle	

The lesson is designed as a cross-curriculum among Math/Geometry/Shapes,ELA, and Fine Arts.

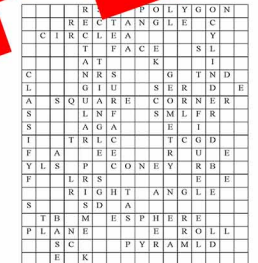

Geometry Vocabulary

- Point:** a location on a line or surface.
- Line:** a straight path that has no end.
- Ray:** a part of a line that has one end and goes on forever in one direction.
- Angle:** a figure formed by two rays or two line segments meeting at a common endpoint.
- Right Angle:** an angle that measures 90 degrees.
- Acute Angle:** an angle that measures less than 90 degrees.
- Obtuse Angle:** an angle that measures more than 90 degrees.
- Circle:** a round shape that is the same distance from the center at all points.
- Sphere:** a round object that is the same distance from the center at all points.
- Cylinder:** a solid that has two parallel circular bases connected by a curved surface.
- Cone:** a solid that has a circular base and a curved surface that tapers to a point.
- Pyramid:** a solid that has a polygonal base and triangular faces that meet at a common vertex.
- Rectangle:** a polygon with four sides and four right angles.
- Triangle:** a polygon with three sides and three angles.
- Polygon:** a closed shape with straight sides.
- Face:** a flat surface of a solid figure.
- Surface:** the outside of a solid figure.
