## Style One: Oil Pastel/Crayon Pumpkin Drawing

This is the first art lesson I teach my first graders each year. I do this drawing lesson with my students in the second week of each school year so the finished drawings will be ready for parents to view during back to school night and will be ready for Halloween too.

The goal of this lesson:

- Show the light source
- Create 3D effects
- Introduce basic coloring skills

### Step 1: Demonstrate Sample Drawings to

- Paste all the Teacher Sample Drawings 1.1 and 1.2 on the wall for students to see. They don't need to copy them, they can cross out the parts they don't like.

### Step 2: Using a pencil, draw the outline of the pumpkin and leaves

- Pumpkins: Draw the pumpkin in a simple shape. Each pumpkin should be about the size of the palm of your hand. If the pumpkin is too big, it will take too long to color and too much time. If the pumpkin is too small, tell them to make it bigger. Each pumpkin must have a stem.
- Leaves: Draw long and curly leaves. The leaves should be about the size of the palm of your hand. The correct shapes of pumpkin leaves should be like the leaves in Teacher Sample Drawings 1.2, and 3.
- Vines: Draw the vines. The vines should be like the vines in Teacher Sample Drawings 1.2, and 3. However, the wedged lines are hard to draw, so I usually tell my students to draw the leaf shapes they are used to. Refer to the leaves in Teacher Sample Drawings 4 and 5.

### Step 3: Trace the picture with a black sharpie.

- Pictures will always look sharp after tracing with a sharpie.

### Step 4: Color the pumpkin with oil pastel.

- If you don't have oil pastels, you can use color crayons instead. Oil pastels are preferred because of their brilliant colors.
- Light Source and 3D Effect: Tell students to imagine the sun is shining down from the top left corner. The area of the pumpkin closer to the sun are shaded lighter while the

area away from the sun are shaded darker. For each pumpkin section and each leaf, we will try to use the three shades to represent the 3D effects.

- Pumpkins: For each pumpkin,
  - color yellow for the part near the sun. Refer to Teacher Sample Drawing 1.1.
  - color orange for the middle area. Refer to Teacher Sample Drawing 1.2.
  - color red for the part far from the sun. Refer to Teacher Sample Drawing 1.3.
  - In order to create 3D effects, apply the light color slightly on the edge of the pumpkin to show the light source.
  - After coloring one section of the pumpkin under your guidance, they should be able to color the rest of the pumpkins on their own, but you still need to walk around to ensure they use the three shade for each section: yellow, orange, and red.
- Leaves: For each leaf,
  - color yellow for the part near the sun. Refer to Teacher Sample Drawing 1.1.
  - color the rest of the leaf with light green. Refer to Teacher Sample Drawing 1.2.
  - color darker green for the part away from the sun. Refer to Teacher Sample Drawing 1.3.
  - Alternative: You could just use light green and dark green. The leaves are too tiny. Refer to Teacher Sample Drawing 4 and 5.
  - In order to create 3D effects, apply the light color for the edge of the leaf to show the light source.
  - After coloring one section of the leaf under your guidance, they should be able to color the rest of the leaves on their own, but you still need to walk around to ensure they use the three shades of green for each leaf: light green and darker green.
- Vines: For each vine,
  - Trace each vine with a sharpie. Refer to Teacher Sample Drawing 1.2.
  - Apply a thin line of light green to the top of the light green to show 3D effects.

### Step 5: Background

- Students can draw background if they like. They can draw sky, butterflies, green field, brown fences, and etc. to make the drawing fancy. I always ask my students using their own crayons to color the background for two reasons:
  - Shows layers of the drawing and make the pumpkins more catchy to the viewers.
  - It just costs too much to buy oil pastels for the class.

### Step 6: Final Check

Refer to Teacher Sample Drawing 1.4 and 2.2 (Both are completed drawings).

- Have I used 3D effects in my pumpkin drawing?
- Have I used solid color and left no white spots in my coloring?
- Have I tried to draw as well as my teacher's drawings?

## Style Two: Chinese Traditional Pumpkin Painting

I often use this project as a Halloween center activity or use it as one of my Chinese New Year art projects.

Goal is to introduce Chinese traditional painting.

Notes: Oil pastel pumpkin drawing will take you the whole period to finish. Chinese traditional painting will be done in no more than 5 minutes. I suggest that you do the Chinese traditional pumpkin painting for 4 or 5 minutes. For lower grade students so you to supervise their brush usage. The pumpkin painting should be a whole class activity.

### Step 1: Demonstrate Sample Paintings
